Guidelines for Ensuring Student Safety and Security

13.07.2024

Dear Parent

Greetings of the day!

We, at SPS, have always believed in implementing and following comprehensive measures for our students.

As part of our ongoing efforts to ensure the well-being and safety of our students, it is essential that we emphasize certain guidelines to maintain a secure environment within and surrounding our educational institution.

We request you to familiarize your children with the safety protocols devised by our school, which prioritize their safety and security:

- **Not to speak to strangers** - not even those asking about addresses or landmarks.
- If someone attempts to force or bully you, scream "**HELP**" loudly.
- Do not stop at vendor stalls near the school or anywhere else. After dispersal, directly go home.
- Students who go home by self should preferably have a **BUDDY** from the vicinity so that they are not alone.
- In case a student is found **outside the school boundary area after 2:15 p.m.**, parents will be called to collect the child from school.

We have always received your support in all our endeavors for the well-being of our children and we know you will continue with the same.

Regards

Principal
